

System overview

Partially connected protective conductor terminals DIN 35

Various partially interconnected protective conductor terminals.

Components

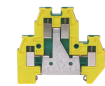

30544/4V - Protective conductor terminal DIN35 4mm² green yellow

Protective conductor terminal partially shuttered Stainless steel screws and springs

30544/6V - Protective conductor terminal DIN35 6mm² green/yellow

Protective conductor terminal partially shuttered Stainless steel screws and springs

3430/4V - PE double level terminal DIN35 4mm² green/yellow

Double level protective conductor terminal block partially wired on both sides
2x3-digit designation option

30544/10V - Protective conductor terminal DIN35 10mm² green-yellow

Green-yellow protective conductor terminal, partially wired, 48x8x42 mm,
stainless steel screws and springs.

3430/4GRV - PE double level terminal DIN35 4mm² gray

Double level protective conductor terminal block partially wired on both sides
2x3-digit designation option
