Profile rail DIN32

DIN rail DIN32, universal carrier made of a sheet metal profile in electrical engineering for fastening electrical equipment in distribution boxes, control cabinets, junction boxes, etc. Different components (for example relays, impulse switches, timers, circuit breakers, terminal blocks) can be slid onto a carrier rail from the side or plugged on and locked from the front. The assembly of control cabinets and switch boxes is facilitated by this standardized method, which reduces labor costs.

Profile rails DIN15, DIN32, DIN35

Various mounting rails and combination rails.
