Profile rail DIN15

DIN rail DIN15, universal carrier made of a sheet metal profile in electrical engineering for fastening electrical equipment in distribution boxes, control cabinets, junction boxes, etc. Different components (for example relays, impulse switches, timers, circuit breakers, terminal blocks) can be slid onto a carrier rail from the side or plugged on and locked from the front. This standardized method facilitates the assembly of control cabinets and switch boxes, thus reducing labor costs. The different types of rails are in the standard EN 60715.

Profile rails DIN15, DIN32, DIN35

Various mounting rails and combination rails.
